

CONTENT STUDIO

AI-Powered Content Production

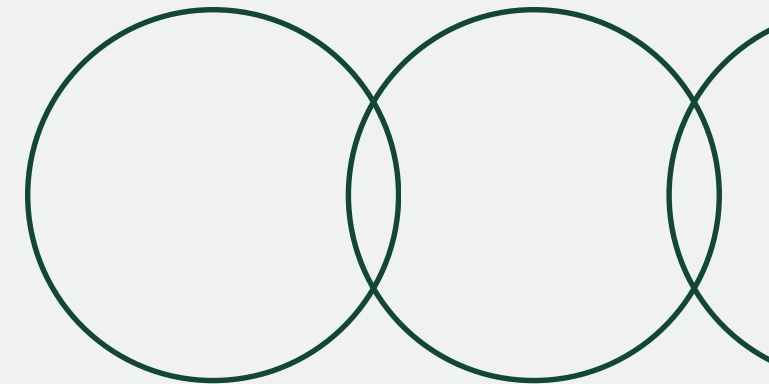

Presented by [Your Name Here]

The Content Creation Challenge

Slow and Fragmented Processes

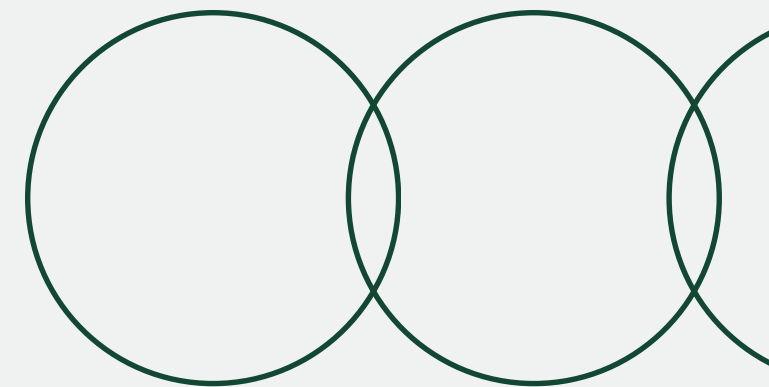

Social teams struggle with disconnected tools, leading to hours spent crafting AI prompts that align with brand voice, ultimately causing delays and inconsistencies in the content production pipeline.

The Unified Workspace

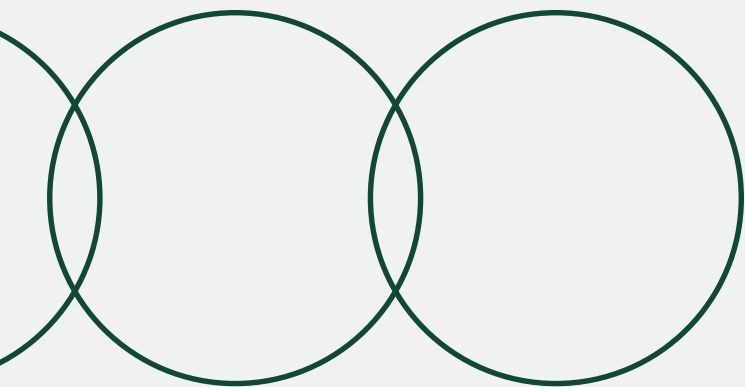

Streamline Your Content Creation

Content Studio consolidates branding elements, enabling teams to produce **consistent and on-brand** content efficiently. By integrating everything into one platform, businesses can focus on strategy, not logistics.

Product Overview

A streamlined process for effective content creation

Brand Profile

Create a comprehensive brand profile, detailing identity, tone of voice, and visual style to guide all content generation.

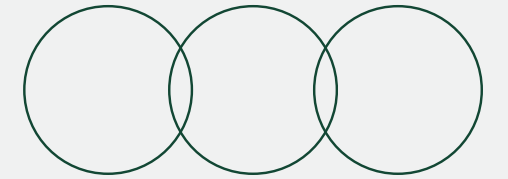

Content Calendar

Utilize AI-assisted planning to build a content calendar that organizes posts and schedules them efficiently for optimal engagement.

AI Prompts

Generate on-brand prompts for images, videos, and captions, ensuring consistency and quality across all social media platforms.

Target Users

Built for social media professionals

Social Media Managers

Social media managers need efficient tools to plan and produce content across multiple brands, enhancing collaboration and streamlining workflows while ensuring on-brand messaging in every post.

Small Business Owners

Small business owners require accessible solutions to maintain a professional online presence, allowing them to manage content creation independently without the overhead of hiring an agency or expert.

Marketing Agencies

Marketing agencies seek consistent branding across various client accounts, enabling them to deliver high-quality, on-brand content quickly while managing multiple projects and deadlines efficiently.

Key Features

Brand Identity Engine

Extracts tone, style, and visual identity from brand info and reference images for consistent content creation.

Content Calendar

Plans, generates, and manages scheduled posts with AI assistance, simplifying the social media workflow for users.

Reference Image Analysis

Analyzes inspiration images to turn them into usable style directions, enhancing creative options while maintaining brand consistency.

AI Image Generation

Generates on-brand image, video, and caption prompts to streamline content production and maintain brand integrity.

Prompt Library

Offers a searchable, reusable history of on-brand prompts, allowing easy access to previously generated content for future use.

Market Opportunity

A rapidly expanding sector for AI content solutions

Growing Demand

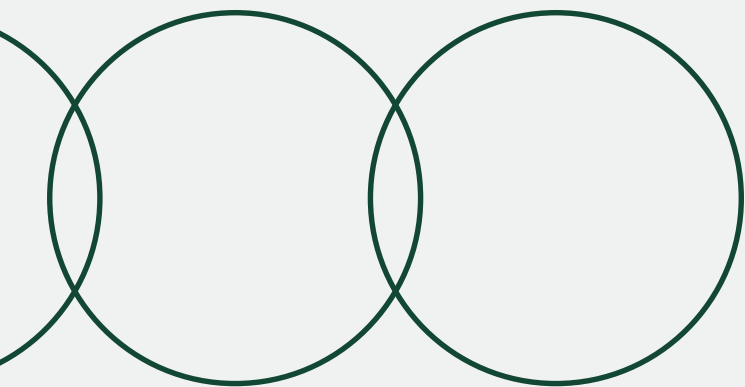

Demand for AI-driven tools in content creation is surging, especially among small businesses and marketing agencies seeking efficiency and effectiveness.

Unique Positioning

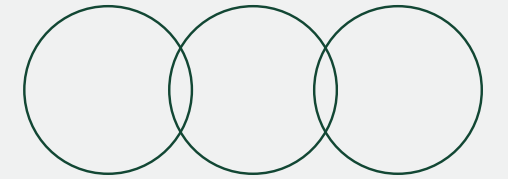

Many existing tools focus on scheduling or content generation, but Content Studio uniquely integrates both features for seamless workflow management.

Untapped Potential

The market for brand-consistent AI content production remains underserved, providing a significant opportunity for growth and innovation in the sector.

Business Model

Simple Subscription Pricing

Starter Plan

Our **Starter Plan** offers core features for a single brand, ideal for solo creators and small businesses looking to harness the power of AI in their content production.

Pro Plan

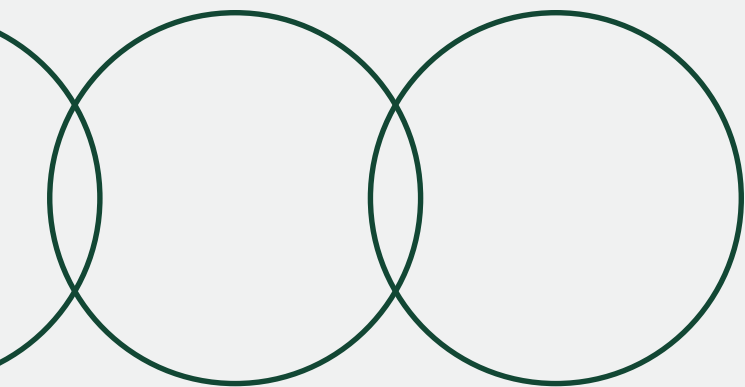

The **Pro Plan** supports multiple brands and includes a comprehensive content calendar, making it suitable for growing teams that require more advanced features and collaboration tools.

Agency Plan

Designed for marketing agencies, the **Agency Plan** allows for unlimited brands and team seats, providing essential tools for managing several client accounts efficiently and effectively.

Roadmap Overview

From local tool to multi-tenant
platform expansion

Current Features

Today, we offer a core workflow including brand profiles, content calendars, AI prompt generation, and a prompt library for users.

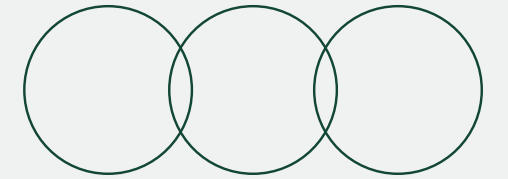

Next Steps

Our immediate focus is on implementing multi-tenant accounts, finalizing the visual design system, and completing Google Drive export capabilities.

Mid to Long-Term

In the mid-term, we'll enable direct publishing, team collaboration features, and an analytics dashboard for enhanced user insights.

The Ask

Building our AI content engine

Funding Opportunities

We are raising a seed round to support the development of our multi-tenant platform, focusing on creating a robust infrastructure for content generation and publishing integrations.

Strategic Partnerships

We are seeking design partners and pilot customers, particularly agencies and small business teams, to collaborate on refining our offerings and ensuring market fit.
